Professional Summary: Develop and execute social and behavioral research in academic and professional settings, with experience in qualitative and quantitative research. Create instructional materials in medical, technical, and literary venues. Conduct formal and informal instruction in settings including one-on-one training, small group instruction, and formal classroom settings. Present original research regularly at conferences. Maintain and develop a high degree of computer competency to facilitate teaching and learning opportunities. Possess over eleven years experience in nuclear medicine and over fifteen years in healthcare.

Areas of Expertise

Teaching

- Develop new materials, including handouts, assignments, videos, and lecture materials for academic coursework.
- Use online technology, such as Course Studio, to deliver course materials, lecture handouts, and recordings of lecture.
- Employ real-world data and relevant software, such as SPSS in the classroom to increase student participation and skills.
- Schedule additional review sessions of classroom time to ensure student readiness for classroom work.
- Develop informational handouts for patients based on user input, increasing compliance with complex procedures.
- Adapt medical, educational, and technical guides in order to communicate detailed processes in clear terms.
- Lead and participate in numerous conference panel discussions, specializing in sociological and technological concepts.
- Co-taught over twenty staff members on the use of new equipment in a production environment.
- Student-taught multiple sections of sociology with minimal supervision, including the revision of coursework and development of original classroom material.

Research

- Perform single and multi-site research projects assessing the needs of non-traditional college students.
- Created and executed a qualitative research project evaluated needs of a marginalized population in a university environment.
- Independently developed and verified a survey instrument to assess prejudice within a postsecondary institution.
- Conducted quantitative research evaluating the effectiveness of methods to reduce prejudice within a postsecondary institution.
- Designed and evaluated a survey instrument used to assess the impact of management initiatives.
